WORK EXPERIENCE

Frontend Engineer

07.2023 – present

Doodle

Working within an international team to develop a scheduling tool dashboard used by millions of users worldwide. The technologies used include Next.js, ReactJS, TypeScript, NX Monorepo, react-testing-library, storybook, swr, and various other JavaScript libraries. Communicating and introducing new features to frontend community, helping with implementation of new technologies and improving our codebase and design system.

Frontend Engineer

01.2022 – 07.2023.

Symphony

Working on various dashboard-like products for top tier clients in America and Europe. Leading and estimating couple of projects from design phase until the development end. Architecting few POC and beyond POC projects, deciding on technology to be used for frontend projects.

Frontend Engineer / FE lead

03.2021– 01.2022.

Linkgraph

Working on SEO dashboard and Chrome Extension used for analyzing website traffic and providing different analytics data. Taking leadership of international FE team. Managing and organizing workflow on daily basis, developing new features and showcasing to other developers involved, Engaging in division of responsibilities and helping other developers in solving various complex tasks/bugs. Tech stack used (amongst other): NextJS, MobX, TypeScript.

Software Engineer Associate

09.2020 – 03.2021.

Printec

Working in industry leading company on writing scalable software interfaces used for ATMs all over the world. Mainly using vanilla JavaScript and ATM development specific tools.

Full Stack Engineer

12.2019 – 09.2020.

Creative-Brackets

After successful end of internship I got employed as a Full Stack developer with the accent on PHP, working on websites and apps for various clients (online stores, CMS systems and similar)

Full Stack Engineer

12.2019 – 09.2020.

Freelance and personal projects

Staying up to date with new stuff is challenging in our industry. The way around it for me was engaging in freelance and personal projects that help me try new technologies and play around with them. I always have some personal project that I like to work on in free time.

OTHER INTERESTING STUFF ABOUT ME

I am a proactive person and philomath. I enjoy learning new things and following tech trends (Frontend especially). I love meeting new people and can easily adapt to new environments and changes, and am always up for new challenges. I am proficient in the English language. I am always exploring and learning through personal projects. Some of them are in private repos, but some of them are public - you can check them out on my github: <https://github.com/danesto> and if you want to find out more about me as a person or about my experience or projects, you can check out my portfolio website: <https://devgalaktika.vercel.app/>
